

SPECIFICATION AMENDMENTS

Page 3:

BRIEF DESCRIPTION OF THE DRAWINGS

In the drawings, which illustrate embodiments of the invention:

Figure 1 is a front view of the tool;

Figure 2 is a front view of the marker;

Figure 3 is a perspective view of the tool and marker; and

Figure 4 is a front view of an alternate embodiment of the tool.

Figure 5 is a front view of an alternate embodiment of the tool of the present invention showing the movable member.

Page 4:

It will be readily understood by one skilled in the art that the number of magnets 20 disposed about the depression 12 is not essential, as one or more magnets 20 may be provided to hold the marker 14 on more than one end. Figure 4 illustrates another embodiment of the invention, wherein the magnetic material comprises one magnet 24 of annular shape, centered about the depression 12.

In yet another embodiment as shown in figure 5, a movable member 30 may be disposed in the opening 22. When the movable member is moved or pushed while the ball marker 14 is held in the depression 12, the member moves the ball marker 14 away from the magnetic material a sufficient distance to release the ball marker 14 from the depression 12.

IN THE DRAWINGS

Please add figure 5 enclosed herewith.
